

Design production and assembly is carried out in our ISO certified company with 20 years of experience in telescope making – Made in Austria.

ASA EQ1000

1000 mm Ritchey-Chrétien equatorial telescope f6 f2

ASA EQ1000

ASA OPTIC

- Main mirror optical size is > 1000 mm
- Resolution is inversely proportional to the size of the primary mirror. The larger the diameter of the mirror, the better the theoretical resolution. A larger telescope theoretically can resolve more details than a small telescope at a given wavelength. Therefore the difference in comparison between e.g. 600/700/800 mm mirror size is significant.
- Mirror material: Fused silica (quartz), ultra-low thermal expansion 0.55e-6/°C
- Guaranteed surface quality: $\lambda/24$ RMS wave front accuracy (> 94% Strehl)
- The mirrors are made in our own optics production facility

ASA Direct Drive

- To achieve the given resolution of a telescope system the tracking performance of the mount is a significant factor
- Equipped with high-res absolute encoders no homing is necessary
- Typical pointing accuracy is < 8" RMS with pointing model
- Tracking accuracy < 0,25" RMS within 5 minutes
- Slewing speed is up to 10° per second

ASA Software

The TCU (telescope control unit) is an integrated part of the telescope and controls all ASA hardware components. The communication between the TCU and user interface runs on an external, customer owned computer using a TCP/IP interface based on a proprietary ASA protocol.

The customer is free to choose on which operating system he wants to install the client user interface. You can choose between Linux (tested on Ubuntu 18.04 LTS), Mac OSX and Windows 10.

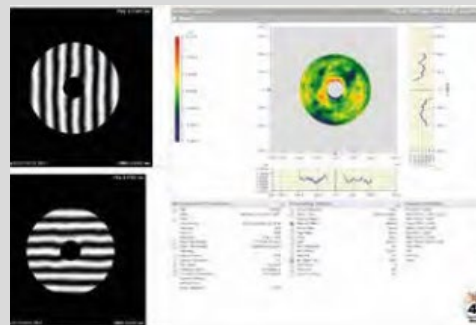

In addition to operation via a graphical user interface (GUI), the individual ASA components can also be controlled by a Software Development Kit (SDK)*. Special add ons like the high precision tracking of satellites (Two Line Elements – TLE and Consolidated Prediction Format – CPF) are available.

*Additional software add-ons are not included in the basic price

- 600 mm
- 700 mm
- 800 mm

	Light Gathering Power	Resolving Power
600 mm	100%	0.223"
700 mm	119%	0.191"
800 mm	142%	0.167"

ASA EQ1000 in Austria

INCLUDED WITH DELIVERY

- Motorized focuser – Absolute encoder
- Laser for optical collimation
- Telescope electronic racks including all power supplies for the telescope
- IP-Remote power switch and ethernet switch
- TCU (telescope control unit), Software, TCP/IP interface

ASA AZ1000 DIMENSIONS

Weight: 2100 kg (4630 lbs)

MATERIALS USED

- Carbon
- High-end aluminum, CNC machined

OPTIONAL

- ADR6 ASA derotator with absolut encoder
- Motorized main mirror covers
- Customer specific camera adapter
- Correctors: Field flattener, reducers

ASA EQ1000 APPLICATIONS

ASTRONOMY

SPECTROSCOPY

SPACE DEBRIS DETECTION

SATELLITE LASER RANGING

LASER COMMUNICATION

QUANTUM KEY DISTRIBUTION
